Gender Pay Reporting Statement

April 2019

From April 2017, all organisations that employ over 250 employees are required to report annually on their gender pay gap. The gender pay gap is defined as the differences in the average earnings of men and women over a standard time period, regardless of their role seniority.

Ideal Cleaning's staff are divided into two distinctly different payrolls, one is for the cleaning operatives, made up of 783 relevant employees, working on average 12.37 hours per week, and another payroll for 29 mainly full time managers and directors.

The two payrolls combined produce an unusual report, in that the mean and median gender pay gaps are very different.

The median results are heavily influenced by the 783 operative employees, 96% of the total number of employees.
